Product Information

Integrated Power Actuator IPA 3505

TELSONIC exclusively introduces the innovative, brand new IPA 3505 actuator unit with integrated generator. This unit can be operated in welding machines, opens entirely new possibilities to the users and offers various advantages for conception, building and production. A patent is pending for the IPA.

Advantages

- Trouble free mounting (mechanically and electrically)
- Simple system analysis
- Easy handling
- High operational reliability
- PLC controlled
- Extremely economical
- Integrated upper and lower end position
- Integrated end position damping

No longer required

- HF-connectors and cables
- External generator
- Sequencer
- Electrical cabinet
- Confusing wiring
- Extensive error search

Technical data

- Generator 500 W
- Frequency 35 kHz
- Stroke 50 mm
- Force 450 N

With the new IPA 3505 TELSONIC continues to introduce new innovative ultrasonic components for the plastic processing industry. The advantages for the end-users and machine builders are always at the forefront of our efforts.
